

Product: Limestone Feed Grade

About:

Known as the essential ingredient in an animal’s skeletal system, calcium also plays a role in nerve impulse transmission, blood clotting, milk production and eggshell development. It impacts tooth development, heart beat regulation and reproduction. It’s the most abundant mineral found in the body, and adequate dietary levels of calcium are required daily. Our calcium carbonate (CaCO₃) is an ideal choice because of its purity, high calcium content and high bioavailability.

Description & Applications:

A fine high brightness calcium carbonate powder derived from pure limestone. It is characterized by its high purity and whiteness. **It** is used in feed industry and other applications.

Chemical Composition and Physical Properties:

Chemical Anyalysis	%
Caco3	99.20
Cao	55.15
SiO2	0.05
Fe2O3	0.03
Al2O3	0.02
Mgo	0.07
NaO3	0.06
SO4	0.04
PH Value	9
L.O.I	43.26

Whiteness: MIN 93%

*** sizes available upon the request of the clients.**
